

PYTHON

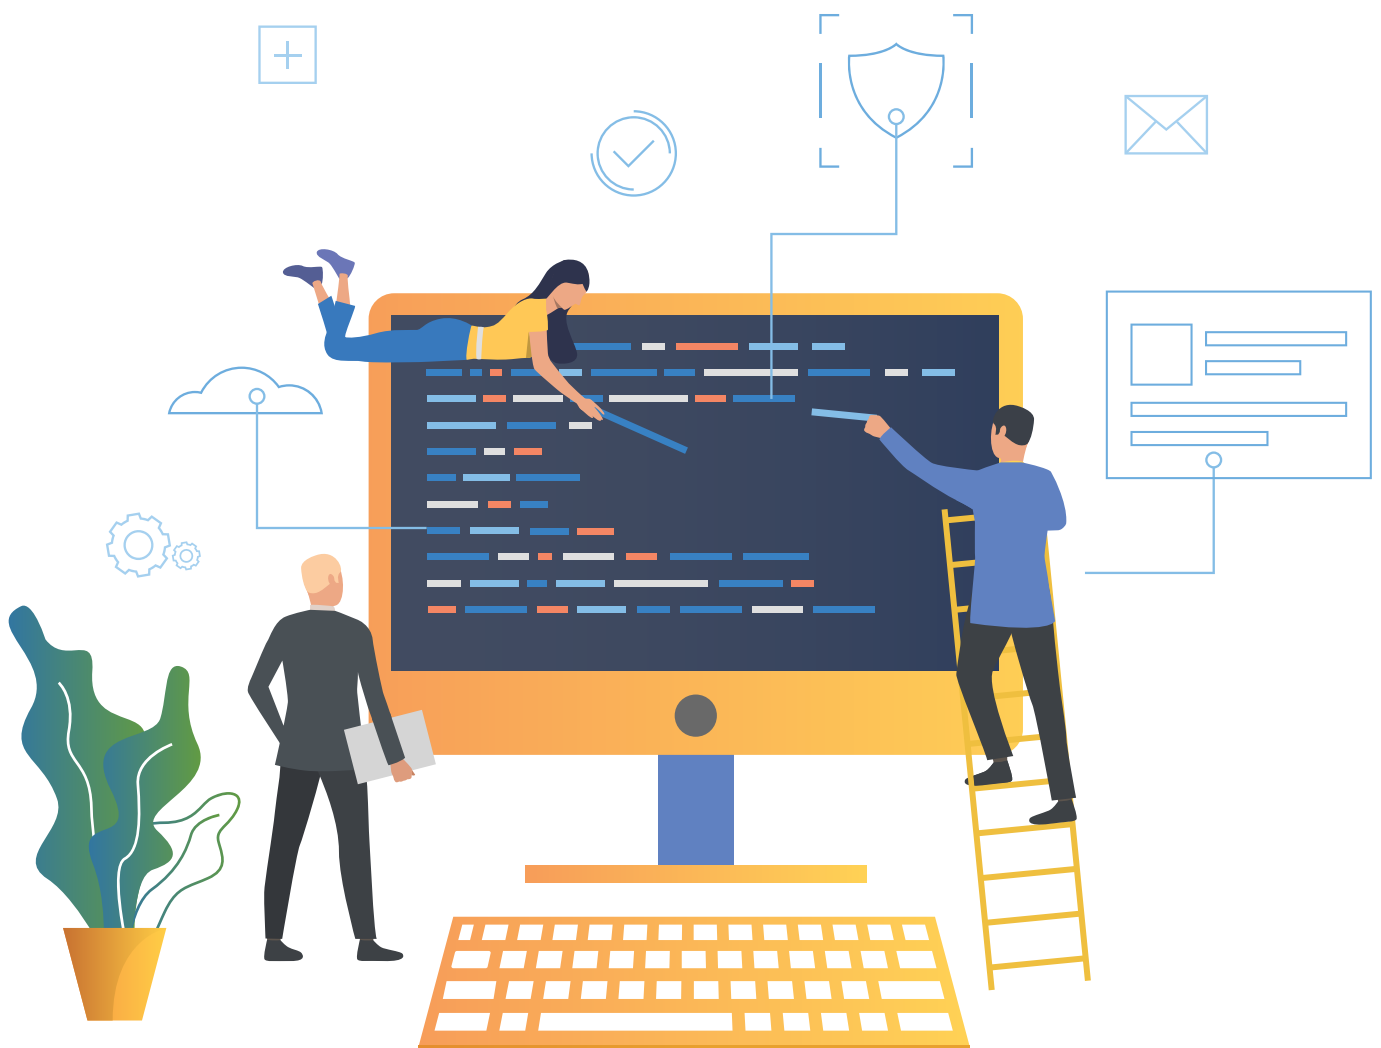

CERTIFIED PROGRAM IN

PYTHON

Overview of Program

- ▶ Pythonic way of Programming
- ▶ Updated to Python 3.9
- ▶ Hands-On Programming
- ▶ Assignments and Project
- ▶ Object Oriented Python

Why would you need to learn python?

- Python's popularity & high salary
- Python is used in Data Science
- Python's scripting & automation
- Python used with Big Data
- Python supports Testing
- Computer Graphics in Python
- Python used in Artificial Intelligence
- Python in Web Development
- Python is portable & extensible
- Python is simple & easy to learn
- Mature and supportive community
- Support from Renowned Corporate Sponsors
- Hundreds of Python Libraries and Frameworks

What are the career options after completing the course?

Python is a popular language in the domains like automation, testing, web development, penetration testing, Networking, Robotic Process Automation, Blockchain, Data Science, Artificial Intelligence etc. So learning Python can be your first step towards attaining a job in such domains

Key Highlights

- One Month Course [30 hours]
- Pythonic way of programming in Python
- Online/Offline Mode of learning
- Weekday/Weekend Classes
- Extensive Coverage
- Hands-On Programming in Class
- Regular Assignments and Tests.
- Project
- Mock Interviews

CERTIFIED PROGRAM IN PYTHON CURRICULUM

MODULE

- Introduction to Python

MODULE

- Control Flow in Python

MODULE 5

- Files and Exception Handling

MODULE 2

- Python Data Model

MODULE

- Functions , Generators and Iterators

MODULE 6

- Object Oriented Python

Why Learn Digital Academy ?

Best Professional training institute of Data Science

Both Online/Classroom and Weekday/weekend training

Experts Designed Project based Curriculum

Real Projects with dedicated experts team

One to One doubt Clearing Sessions for analyzing students improvement.

Resume preparation and mock interviews by Senior Data Scientists

Post training support with 100% Placement assistance from Jain University

Certification from Jain University

PLACEMENT ASSISTANCE:

Learn Digital Academy Provides 100% placement assistance throughout the program to guide and help you get job ready from day 1

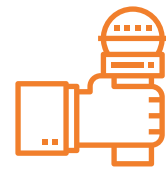

Resume Building

Refine and Polish your resume with expert tips to help you for better job opportunities.

Interview Prep

Prepare you to face HR and technical Interview rounds with interview Q&A.

Mock Interviews

One to one mock interviews with industries experts

ADMISSION PROCESS:

STEP 1- Taking Telephonic interview to know the background of the students.

STEP 2 - If the student is interested in the course He/she will be provided with online or live interactive class to clear his/her doubts about the course.

STEP 3- If student is satisfied with the interaction then they can proceed with enrollment.

MAP YOUR FUTURE IN

- Python Programmer
- Web Development
- Penetration Testing
- Automation
- Data Science
- Robotic Process Automation
- Blockchain
- Artificial Intelligence
